The classification will be defined by the sum of the times of the first three athletes of each country, provided that they are integrated in the same age group.

If there are three or more athletes within the same age group, team registration is not necessary, being the team automatically constituted by the top three athletes classified.

SUGGESTION

Registration is necessary if one or more athlete from one category make composed team in other category with events started at the same time.

COMPOSED TEAMS

If the team is made up of three athletes of different age groups, but who compete at the same time in the same race, the team will be ranked in the lowest age athlete category.

In this situation it is mandatory to register the team.

If an athlete from an older age group will be registered to the composed team and event taking off at a different time of his category, he/she will not be individually classified in the appropriate age groups for themselves.

The list of participants in the competition will be released before the start of the competition.
